

LED Street Lamp

LED Street Lamp

LED Street Lamp

specification: 1W large power white LED Street Light

power: 50W~150W

driving power supply: input voltage AC220V50Hz

current: 320mA30~130V

luminous flux >8000lm(150W)

average lighting range: 18~42m

color temperature: 4000k-6000k

environment temperature: -30~+45

lamp cup defend: class IP65

suitable humidity ≤95%

operating life≥30000

installation height: 6~14m.

Features:

LED Street Lamp has long operating life and high permeation fog ability. The average operating life of common LED Street Lamp is 12000 hours, the change cost of common LED Street Lamp is very high, and influences traffic. The average operating life of our LED Street Lamp is 80000 hours, over ten years. With good waterproof, impact proof and shock proof, our products are

absolutely worth trusting. Because of the stable and reliable quality, it is widely used in all types of street, saving energy over 75% to 90%, it has the low fever, non burned led cup, environmental protection and wonderful outlook features. This kind of LED Street Lamp won't generate light pollution. It belongs to typical green lighting lamp-house and safe low voltage product comparing with common LED Street Light.
