LED wall washer

LED wall washer

We specialize in designing and producing various LED lights such as LED Spot Light, LED wall washer and LED streetlight. LED lights are better. LED light bulbs with high power LED are resistant to shock and vibration. It provides long lifespan and high quality. LED light bulbs can bring clean pure white light and great colors. Especially, slim, very low bright white light is used for any indoor use. LED lights often add extra optics to the chip that shapes its radiation pattern. The LED lights are suitable for use as feature decoration in places such as building outer wall, squares, malls, homes, shop cabinets and so on, as well as partial lighting for offices and reading rooms. They are available in warm white, cool white, pure white, blue, green, red, yellow.
